As someone who bought train simulator to play with two small boys this is the perfect DLC for TS. Navigating the track itself does offer some small challenges what with the steep inclines, sharp bends and ease with which the model train tips over. Pricing is about right at the sale price IMO.

Also, there's a wagon with a dinosaur on it, this means that every train we drive ever, will now have to pull these.. hello there i like the route and locomotive, but the introduction is kinda creepy because the gnomes can move and I had to end the scenario because it was so freaky. I would suggest this so you could drive this on quick drive if you don't like cringy stop motion animation.

All the best

LMBR

LondonMidlandzBritishRail. Fun and charming. The layout is fairly detailed, and the scenarios give a decent variety of short tasks equal to roughly an hour of gameplay.

As far as difficulty is concerned, the first few scenarios assume no knowledge of how to play Train Sim (which is probably smart as it's standalone), but the difficulty doesn't ramp up very much after that, so don't expect to have to try too hard to finish with a good score.

I'd say it's worth the \$3, and the \$5 package with last year's holiday DLC is definitely a good value if you missed it the first time around.. It's brief, easy and fairly entertaining. I'm not sure how large of a child playerbase there is for it, though. I think this is a great little DLC and the price is worth it. The history, The line and the train is made good. There is only 2 things that could have done better. 1 the train dosnt have a horn, like WTF c\u00b4mon on you could have given it a little horn. 2. In 2 senarios its simply to dark to see what you are doing. Its guessing most of the time, a little more bright would not hurt any one.. JUNK TRASH dont buy it. does not work, train stop after 10 seconds ..... Buy it for my son that can not play it. RIPOFF. Uhhh.... I was high when I bought this. For sure.. This game is well done and I enjoy playing it with the kids every holiday. I was hoping for more DLC like this and the holiday express they were both well done.. This pack only needs three words; I LOVE THIS!. The holiday routes are a fun addition.

---

I'll be honest, this is MUCH better than the Holiday Express.

The loco you get is a small shunter with some christmas lights and a lighted christmas tree on it. The glowing lights emit a small section of light which is a really nice touch. It does not have an actual cabview which is a shame, so you are forced to use the HUD or your keyboard.

As far as wagons, you get some flatbeds with various loads (Robots, Teddy Bears, Army men, and more), as well as small green coaches that can be found in the Isle of Wight Add-on pack. Both have christmas lights on them and glow just like the locomotive.

The route I'd say is much better than the Holiday Express, the outdoor route is much more pleasing and interesting than the indoor one the Holiday express had.

Would I recommend this DLC pack? \$2? Sure. \$9? You're asking alot there, and for only a couple scenarios and other things, it's not worth the \$9. \$5? Sure. I think it's definately worth \$5.

Is it better than the Holiday Express? Far better. Granted you only get one locomotive, however, the locomotive will work in any route unlike the Steam locomotive from the Holiday Express (which is actually an Electric loco and will only work on electric routes).

If you really want both Holiday packs, the \$5 bundle they have currently going is perfect.. Very enjoyable Xmas themed pack, great for kids or adults alike,. A fun game for the kids during the holiday season. Worth the sale price.. Thought this would be cute but it's too dark to really see anything. A real toy train doing circles under the Christmas tree would be more fun than this. Absolutely no point in wasting your time playing this DLC.. This route is very creative and fun. The Loco is nicely detailed with some fun additions such as holiday lights. The scenarios are also very creative and fun. I think this route is better then the Holiday Express Route. Overall I would definitely recommend this route (especially on sale).. I'm impressed. For the price, this is a really cute little scenario pack. In the same vein as the earlier Halloween DLC (The Count Of Monster Disco) this has a nice, cartoony style, and should appeal to both kids and adults. The scenarios aren't too difficult and the game really eases you in if you haven't played any Train Simulator before. Check out my full playthrough below.

<http://youtu.be/VT-n65wJioRE>. I bought this DLC for the hell of it honestly (and while it was on sale). The small toy trains provided with it will negotiate the tight turns and sharp grades without any problems. But for me, the best part is to attempt driving realistic trains on such a small track.

[Looks it's best with the season set to winter obviously.](#)

[One sore point for me is that the provided locomotives do NOT have a cab view.. Good little pack with a few short scenarios for when you have 10-20 minutes to spare and dont want to do a full Donner Pass Scenario !](#)

[Well worth the money whilst its on sale. not sure I'd pay the full price of \u00a39.99 for it though as each scenario is a max 10 minutes long, and there are only about 6 scenarios.](#)

[Good fun and a nice fun break from the normal DLC available .Silly, but brilliant fun. just something different for TS201x players. Every grown man have their inner child inside. Recomend this! 10/10 Just for Fun Factor. Jack](#)
